100% Breton production

We have no agricultural land outside our production area, which is situated along the northern coast of Brittany. For us, it makes no sense to expand our production beyond our homeland because what drives us is a desire to add value to our local communities in order to sustainably and successfully live and work in the area.

A brand synonymous with freshness and quality

Europe's number one in fresh vegetables, the Prince de Bretagne brand was created from the desire of Breton vegetable producers to have a strong brand, synonymous with quality and recognised by the entire chain, through to the final consumer.

Prince de Bretagne "Fresh tastes best"

The brand sells fresh fruit and vegetables, harvested by hand and, for the most part, packed directly on the farms, before shipping on the same day or, at the very latest, the following morning.

A large range and significant volumes

Over the course of 10 years, we have doubled the size of our range. Diversifying our crops is essential in order to meet the needs of our clients, to maximise the richness of our soils through crop rotations and to strengthen the economic balance of our farms. Today our 2,000 producers offer a very wide range (147 vegetables) over the course of the year.

Printed in Brittany on 100% recycled paper using vegetable inks.

COOPERATIVES OFFERING BRETON VEGETABLES

Key figures

- 2,000 producers
- 6 cooperatives
- 147 vegetables
- More than 30 organic vegetables
- More than 450,000 tons of vegetables

Research and experimentation, strategic themes

To ensure their independence, Prince de Bretagne producers have also established technical and scientific facilities which allow theirs to:

INNOVATE for the creating vegetable varieties

Access possible to the entire range

* CERAFEL brings together 6 producer organisations : Sica, UCPT, Terres de St-malo, Socoprime, La Bretonne, Triskalia

In 2018, Prince of Brittany is reissuing its CSR Sustainable Development Report. This report is organised around a charter listing all the daily commitments made by Prince de Bretagne producers in order to meet environmental challenges and match consumer expectations.

This charter was drawn up over a period of six months in consultation with all the stakeholders in the Prince de Bretagne network: producers, employees in the cooperatives and research and experimentation centres, Chamber of Agriculture, suppliers etc.

COMMITMENT 1
—
Defending our organisation's values in order to successfully sustain our Breton vegetable network

"Prince de Bretagne is an organisation run by and for producers. This is what makes the Breton vegetable network as strong as it is today."

Gilbert Brouder, producer in Plougrescant (department 22)

COMMITMENT 5
—
Guaranteeing the independence of our producers

"Our cooperatives do not sell phytosanitary products or fertilisers but provide producers with access to a network of technical advisers to support them."

Emilien Mary, producer in Pleurtuit (department 35)

"Our continuous improvement approach and the requirements of the Prince de Bretagne brand's specifications underline our claims about the quality of our vegetables."

Alain L'Hostis, producer in Plougonvelin (department 29)

COMMITMENT 2
—
Offering quality products that are fresh, healthy, good and beautiful

COMMITMENT 3
—
Strengthening our agroecological approach

"Our role as producers forces us to question our practices every day."

Marc Kerangueven, producer in Lannilis (department 29)

"We are proud that, in volume terms, we are France's number one organic vegetable producer."

Bernard Le Saint, organic producer in Plouzévédé (department 29)

COMMITMENT 4
—
Contributing to the development of organic production

Prince de Bretagne producers' Charter of Commitments

COMMITMENT 6

Contributing
to the area's energy
transition

"We are working to find solutions to help contribute to creating positive energy territories."

Hervé Le Chevanton,
producer in Pleubian
(department 22)

COMMITMENT 7

Limiting the impact
of our packaging

"On a daily basis, we apply the 3R rule: Reduce, Reuse, Recycle."

Emmanuel Le Dantec, producer in
Pleumeur-Gautier (department 22)

COMMITMENT 8

Fighting food waste

"For us, food waste is an ethical, economic and ecological issue."

Samuel Aubault,
producer in Saint Père
(department 35)

COMMITMENT 9

Strengthening
the attractiveness
of the farming
profession

"Creating the link between producers and offering them the opportunity to invest collectively and take increasing amounts of responsibility."

Pierrick Gauvin, producer in Saint-
Méloir-des-Ondes (department 35)

"Our goal has always been to live in our countryside and contribute to the vitality of our region, especially its rural areas."

Emmanuelle Moreau, producer
in Pleubian (department 22)

COMMITMENT 10

Defending and
contributing to the
development of our
region

x3
The number of
Prince de Bretagne
vegetables in
15 years

Innovation is at the heart of Prince de Bretagne's development strategy. It is essential to adapt constantly to changes in markets and consumption patterns.

Beyond the very active developments in varieties over the past 10 years, producers have also developed innovations in terms of processes and packaging...

■ Cardinal artichokes voted Saveurs de l'année (Taste of the Year)

The latest arrival in the artichoke family, created by OBS, the plant breeding organisation in the Prince de Bretagne network. It's a new, generous artichoke with a voluminous heart and fleshy leaves.

It's 'softer' to the touch thanks to its rounded leaves, and softer, too, in taste, with a sweet flavour. And it's an award winner, with this beautiful artichoke receiving

recognition in the 2018 Saveur de l'Année (Taste of the Year) competition, a label recognised by 96% of French consumers. Cf. p 18

■ Traditional vegetable trays

One of the reasons consumers don't buy vegetables is that they don't know how to prepare them. To rectify this problem, Prince of Brittany has launch 1.2kg trays of Traditional vegetables accompanied by a recipe card with instructions on how to create tasty dishes for four people. Cf. p 46

■ Heart of Savoy Cabbage: a practical and responsible product

In this new presentation, only the edible part of Savoy cabbages is offered, with the hearts packed in an open sachet printed with modern and quick recipe ideas.

100% consumable, reduced household waste, providing optimised logistics and recycling of the outer leaves as organic fertiliser, the heart of Savoy cabbage is a truly responsible innovation! Cf. p 15

■ The 100% Nature & Saveurs (Nature & Taste) tomato range / No pesticides* - Unique flavour

Always committed to an agriculture which is healthier and more sustainable, Prince de Bretagne's producers have launched a new label called '100% Nature & Saveurs' (Nature & Taste) to identify their tomato crops which are guaranteed to be pesticide-free (no treatments and no synthetic pesticide residues) and offer a unique flavour.

It's a triple commitment which gives this label the most demanding specifications in the alternative production market. Cf. p 34

■ PDO Roscoff onion box

New packaging for this historical and emblematic line in our range: the 1kg PDO Roscoff onion box. It's much more than a standard box as it's made ecologically with no staples or glue, can be reused, carries high-quality printing to ensure it stands out from the crowd and facilitates the home storage of PDO Roscoff onions. Cf. p 23

■ Allitou plait

Brittany pink onions, red onions, Traditional shallots and a head of garlic make up this 1kg allium plait, which is both aesthetic and practical, and designed to be kept to hand in the kitchen.

One by one, each bulb is checked, cleaned and plaited by hand, providing a guarantee of superior quality. It's the natural conservation method par excellence, with plaiting increasing the shelf life of these alliums. Cf. p 22

*Prince de Bretagne's producers use only biocontrol products on their crops labelled 100% Nature & Saveurs (Nature & Taste) and guarantee a tomato free of synthetic pesticide residues (no quantification → 0.01mg/kg following screening for more than 240 molecules by an independent laboratory).

Fresh tastes best

Taste, quality, committed and **responsible production**, committed and **responsible**, traceability, **food safety**, **new consumption patterns...** Consumers and retailers are increasingly seeking to reconcile their concerns and their daily purchases.

For more than 45 years, Prince de Bretagne's producers have been eager to show who they are and what they do, and have invested in marketing and communication for the Prince de Bretagne brand as a **guarantee of strong values and commitments** and to **provide daily solutions**.

PROMOTING THE BRAND AND ITS VALUES...

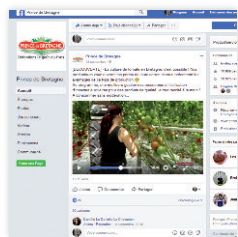

In 2018, the Prince de Bretagne brand is basing its communication strategy around four levers which will enable it to highlight its values and commitments to sustainable and responsible agriculture, thereby meeting the expectations of its consumers and, more broadly, society as a whole:

- **Sustainable development - Corporate Social Responsibility:** with the publication at the start of the year of a sustainable development-CSR report in the form of the brand's charter of commitments.

- **Social networks:** to raise awareness of the fundamentals, to bring more proximity to producers and to offer transparency on production methods.
- **Sailing sponsorship:** with the Maxi 80 Prince de Bretagne trimaran and its skipper Lionel Lemonchois committed to flying the flag for the brand in the 40th running of the Route du Rhum race.
- The partnership with the media-friendly and highly committed chef Jean Imbert.

Sailing sponsorship to maximise media impact

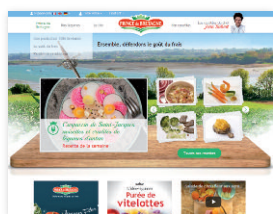

Route du Rhum, departure November 4 in Saint Malo

Meaningful partnership with chef Jean Imbert, 296,000 followers on Instagram

... REMAINING IN THE MINDS OF CONSUMERS IN THEIR DAILY LIVES

Every day, through its digital communications (**website, blog and social networks**) and above all in sales outlets through **in-store activities, POS and packaging**, Prince de Bretagne delivers its message and reminds everyone of the advantages of fresh Breton vegetables and how to use them as part of daily life.

Key figures

- 1 150 producers
- 16 300 ha
- 140 millions heads

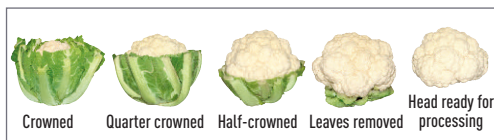

Leader in the European market and France's number one brassica producer with more than 80% of French production. Prince de Bretagne brassicas occupy more than half of the area devoted to field crops in northern Brittany.

An emblematic crop, the range has diversified in terms of colours and shapes, and also in terms of the production schedule. Brassicas are available all year with peak season produce in winter and also in summer thanks to broccoli and Romanesco.

Autumn offers the most diversified range and provides the chance to really highlight the Prince de Bretagne offer.

GREEN CAULIFLOWER													1,4 million
PURPLE CAULIFLOWER													140 000 heads
ORANGE CAULIFLOWER													140 000 heads

Unusual cauliflowers derived from heirloom varieties which are naturally coloured through the synthesis of pigmented antioxidants:

- Orange through the synthesis of beta-carotene
- Purple through the synthesis of anthocyanin
- Green through the synthesis of chlorophyll

Heads are harvested in summer and autumn, and they are perfect as raw florets for an aperitif snack! These varieties require more attention and selection during harvesting.

Originally hailing from the Mediterranean, artichokes have been grown in Brittany since 1810 and today the region is France's leading production area for this vegetable.

Prince de Bretagne's producers of Prince de Bretagne grow two types, fleshy varieties and Petit Violets.

Available from spring until the first frosts, these artichokes offer different sizes, colours and taste qualities.

Production calendar	J	F	M	A	M	J	J	A	S	O	N	D	Volume in tons
CAMUS													20 000
CASTEL													10 000
CARDINAL													1 000
PETIT VIOLET													6 000

PRINCE de BRETAGNE PRODUCT+

- Prince de Bretagne is France's number 1 artichoke producer.
- Production available 7 months out of 12
- Buyer's crates can be accommodated on request (IFCO or others)

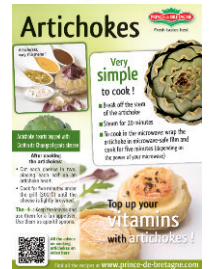

CAMUS AND CASTEL ARTICHOKES

Prince de Bretagne sells two varieties of green, fleshy artichokes: Camus and Castel. Camus is Prince de Bretagne's historical, emblematic variety and is the most widely grown artichoke in France. Castel is a more recent variety, easily

recognised by its brighter colour and very generous heart.

Both varieties are packed in wood or cardboard boxes covered by a plastic film to preserve their freshness.

CARDINAL ARTICHOKES

Cardinal is a new fleshy artichoke offered by Prince de Bretagne. It is notable for its purple colour, 'closed' head and less thorny leaves. It also offers good shelf life. Its flavour is milder and sweeter than Camus or Castel.

Its gentle, sweet flavour has been tested and acknowledged by consumers. Cardinal artichokes have been awarded a 'Saveur de l'Année' (Taste of the Year) award for 2018, so carry an eye-catching logo.

PETIT VIOLET ARTICHOKES

Petit Violet artichokes are notable for their colour and small size. While it is a traditional vegetable in Mediterranean countries, Petit Violet consumption continues to grow in northern Europe.

Prince de Bretagne offers Petit Violet by the head or in 'poivrade' bunches (bouquet of 5 heads). The 500g sachet, a CSU of 4/5 heads which offers better conservation of the product, also carries preparation advice (raw or cooked).

Info for PROFESSIONALS

Conservation

In cool conditions and away from light.

On shelf

A vegetable that dries out easily. To retain their freshness and protect them from sudden temperature changes, spray with water or cover with a damp cloth at the end of the day.

Info for CONSUMERS

How to make the right choice?

Camus and Castel : unmarked and a uniform good green colour, the artichoke should be heavy and short-leaved.

Petit Violet : firm, unmarked and tightly closed head with very dense and slightly prickly leaves.

Conservation

Placing the stems in water (like cut flowers) extends the period they can be kept. Once cooked, artichokes should be eaten within 24 hours.

Fridge

They can also be stored in the vegetable drawer in the refrigerator for several days as long as they are first covered in plastic film to prevent them drying out.

Fleshy Artichokes

Preparation

Break off the stem by hand to remove the strands found around the bottom of the artichoke.

Cooking

Cooking a whole head will take from 7 minutes (microwave) to 30 minutes (in boiling water), and to 20 minutes (steam).

Petit Violet artichokes

step-by-step preparation of Petit Violet artichokes detailed on our Instant POS.

Nutrition

Artichokes are a vegetable offering a source of vitamin B9 and are high in fibre and potassium. They stimulate digestive functions and are recognised for their beneficial effects on the liver and bile secretions.

Key figures

- 560 producers
- 6 000 ha
- 37 000 tons/year

TRADITIONAL SHALLOT

Key figures

- 255 producers
- 1 100 ha
- 25 000 tons/year
- 4 500 tons/year export

Production calendar	J	F	M	A	M	J	J	A	S	O	N	D	Volume in tons
PLANTING/HARVESTING													
SALES												25 000	

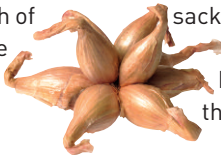

The Prince de Bretagne alliums range is made up of three products specific to Brittany: Brittany pink garlic, Roscoff onions (PDO*) and Traditional shallots.

PRINCE de BRETAGNE PRODUCT+

Prince de Bretagne produces only Traditional shallots: It's a guarantee of buying an authentic shallot

With 25,000 tonnes produced each year, Prince de Bretagne is comfortably the largest producer of Traditional shallots in Europe (around 70% of French production). Traditional shallots are **planted and harvested by hand** and, through vegetative multiplication, produce a bunch of around 10 bulbs. At harvesting, the common root breaks and leaves a callus on the base of each bulb.

Two types of shallot are offered by Prince de Bretagne: long (the majority) and semi-long. To meet all requirements, a highly diverse range of packaging is offered, ranging from the smallest (250g net bags) through to loose sales in 5kg sacks, and not forgetting the 500g plait. Thanks to customised ideal storage conditions, Prince de Bretagne's shallots retain all their qualities throughout the year.

Info for PROFESSIONALS

Conservation
In a cool place away from light.

On shelf

Make it clear on labelling and signage that these are Traditional shallots: this is obligatory under the decree of 16 January, 2007, on the trade in shallots.

Info for CONSUMERS

Making the right choice
Traditional shallots should be firm, shiny and dry. Traditional shallots can be recognised by the presence of a callus on the base of each bulb (a scar from the common root).

Preparation
They can be eaten cooked or raw as a condiment but also as a vegetable dish.

Nutrition
Traditional shallots are a source of fibre. They also have a beneficial effect on the cardiovascular system and offer digestive properties.

Minimum size: 22mm – maximum: 55mm with 20mm maximum difference

Shallot, Garlic

Défendons le goût du frais

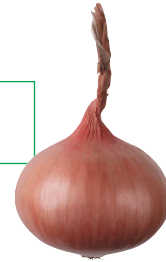

Roscoff onions AOP (PDO) and Brittany pink onions are grown from seeds which were first brought back to Roscoff more than 400 years ago. They are particularly suited to the growing conditions in Brittany and are notable for their flavour and keeping qualities. Sown in spring, they are harvested from mid-July through to late August.

PRINCE de BRETAGNE PRODUCT+

Fruity and sweet taste once cooked

ROSCOFF ONIONS PDO*

CLEANED AND PLAITED BY HAND

Roscoff onions were awarded their AOC (Appellation d'Origine Contrôlée) in 2009 and in 2013 were accorded European recognition with an AOP or, as it is known in English, PDO (Protected Designation of Origin).

Roscoff onions AOP (PDO) -1,500 tonnes per year - are available from August through to April. The 'Roscoff onion' logo opposite guarantees the product's origin, its natural storage and its cleaning by hand, conducted by Prince de Bretagne's producers.

Photos of producers on packaging

BRITTANY PINK ONIONS

Brittany pink onions, produced outside the PDO's geographical area, are packed mechanically, mainly in 1 kg net bags and 5 kg sacks.

NEW

Allitou 1kg plait of garlic, shallots, and red and pink onions

RED ONIONS

NEW

A relative newcomer at Prince de Bretagne, red onions are sown in the spring for harvesting over the summer. Their skin ranges from dark red

to purple, with the inner flesh a red to pink colour. Their flavour is sweet and they are excellent raw in salads.

Info for PROFESSIONALS

Conservation

In a dry and well ventilated place. Do not keep them in the refrigerator. Keep handling to a minimum. Plaits should be presented hung. Be sure to clearly display the product name: Roscoff onions PDO, Brittany pink onions.

Info for CONSUMERS

Making the right choice

Spherical in shape, Roscoff onions PDO* and Brittany pink onions have a good pink colour both inside and outside. Fruity when eaten raw, they become soft and sweet when cooked.

Cooking

Fruity and sweet taste once cooked.

Nutrition

Roscoff onions AOP (PDO) and Brittany pink onions are low in calories and a source of the trace elements copper and selenium.

ENDIVES

Key figures

- 30 producers
- 6 500 tons/year
- 24 farms

Production calendar	J	F	M	A	M	J	J	A	S	O	N	D	Volume in tons
ENDIVE													6 500
CARMINE													25 tonnes

A development of wild chicory, endive has been part of the Prince de Bretagne range since 1970. Throughout the summer, the sandy soils of the Côte des Légendes, in northern Brittany, provide a mild, rich environment for endives.

PRINCE de BRETAGNE PRODUCT+

- A systematic double check is carried out on each batch, upon arrival at the packing station and each morning before being sold.
- Production is concentrated around Kertouan.
- A single set or very strict specifications for all producers.
- Our packing station brings together all of Prince de Bretagne's production.

ENDIVE

In the month of October, growers harvest the roots that have been grown in cellars, protected from the light, thus producing Prince de Bretagne's famous endives throughout the whole winter. Prince de Bretagne's endive offer is divided into several ranges:

- the **indispensables**, marketed in 5kg boxes and 1kg sachets,
- **top of the range** endives marketed under the Endive du Prince banner and the Royale.

CARMINE

For the past ten years, Prince de Bretagne has also offered a new red, small sized endive called the Carmine ©.

Endives

Their beautiful white finish lightly edged with yellow at the tip, reveals their crispness when served raw and their tenderness when cooked.

EASY TO PREPARE

- WASH
- TRIM
- COOK

DID YOU KNOW?

- Remove the base of endives with a pointed knife to avoid bitterness.
- Endives with less sugar make more of a bitter and bitter.

Find all the recipes on www.princedebretagne.com

Infos for PROFESSIONALS

Conservation

Keep in coll, dark conditions.

On shelf

Keep the liner on shelf to avoid greening caused by over-exposure to light.

Infos for CONSUMERS

How to make the right choice?

White, edged with yellow at the tip, which should be closed.

Conservation

Keeps well in the vegetable drawer of the refrigerator.

Preparation

Can be eaten raw or cooked, as a side dish for meat and fish. To reduce the bitterness of endives, add a glass of milk to the cooking water.

Nutrition

Endives are very low in calories and a source of vitamins (K and B9).

LEEK

Fresh tastes best

Like garlic, onions and shallots, leeks are from the Alliaceae plant family. The leek is a rustic plant which demands technical skill and lots of labour. Thanks to the mild climate of our region, Prince de Bretagne can offer leeks for 10 months out of 12 each year.

Production calendar	J	F	M	A	M	J	J	A	S	O	N	D	Volume in tons
LEEK													5 000

Info for PROFESSIONALS

Conservation

Keep in a cool place, away from light.

On shelf

Leeks are prone to drying out. Spray with water at the start of the day and remove any yellowing or withering leaves. At the end of the day, place them in the coldstore.

Info for CONSUMERS

How to make the right choice?

Deep green leaves are a sign of freshness in leeks.

Conservation

five days in the vegetable drawer of the refrigerator.

Preparation

For perfectly clean leeks, dip them in warm

water which will make soil particles easier to remove.

Nutrition

Leeks have a high water content, are low in calories and are well supplied with vitamins (especially K and B9) and fibre. Their fibre stimulates the intestines. They are a source of sulphur compounds, which are beneficial for the cardiovascular system.

STRAWBERRIES

Cardboard display unit offered for presentation of strawberries in mini-punnets, trays, etc...

Strawberry production in Brittany has developed since the turn of the century with a focus on top of the range varieties.

Prince de Bretagne strawberries are particularly known for their taste and visual qualities, in addition to their freshness. They are carefully hand-picked each morning at maturity, and packed directly on the farm to reduce handling to a minimum.

COCO DE PAIMPOL PDO

Grown exclusively in the Côtes d'Armor, Coco de Paimpol was the first haricot bean to receive an AOC (Appellation d'Origine Contrôlée) in February 1998. It received European recognition with an AOP or, in English, PDO (Protected Designation of Origin) in 1999.

Production calendar	J F M A M J J A S O N D												Volume in tons	
	COCO DE PAIMPOL PDO													
														8 000

Coco de Paimpol AOP (PDO) are fresh beans for podding. Prince de Bretagne only sells them fresh.

Harvested entirely by hand, Coco de Paimpol are only sold fresh (in pods). For optimal conservation, they are cooled before packing. A 'chimney' is created in the middle of pallets to ensure good ventilation. Historically sold in 10kg sacks, Coco de Paimpol are also available in 5kg sacks and 1kg net bags to allow consumers to discover this product through smaller packaging options.

Coco de Paimpol AOP (PDO) should be eaten soon after harvesting. Without losing any of their qualities, the podded beans can also be frozen and then enjoyed throughout the year. Prince de Bretagne also offers a non-PDO bean: Brittany's fresh haricot beans for podding, offered in 10kg sack.

Info for PROFESSIONALS

In cool conditions and avoid sudden changes in temperature. Do not store for too long on the pallet.

Avoid exposure to light and heat. Offer loose and in CSU. (note that 5kg and 10kg sacks are often considered as individual sales units). Remember: Specify Coco de Paimpol on signage and labels.

Info for CONSUMERS

How to make the right choice?

Coco de Paimpol pods are pale yellow with purple veins.

They can be kept for a few days in the salad drawer of the fridge.

Easy to cook: no soaking required before cooking. They can be enjoyed hot as well as cold in salads. 10kg of pods provides around 4.5kg of beans. Do not season with salt until cooked.

Coco de Paimpol are a source of magnesium, iron and phosphorus, as well as vitamin B9.

SHII-TAKE

Originating in Asia, shii-take mushrooms have been grown in Brittany since 1988. The second most commonly grown mushroom in the world, they are considered one of the most fragrant and can be used in numerous dishes.

Production calendar	J	F	M	A	M	J	J	A	S	O	N	D	Volume in tons
SHII-TAKE												150	

Shii-take mushrooms are sold cut (through the stalk) and are a clean product.

Prince de Bretagne's shii-take mushrooms are grown in chambers, where the temperature, humidity and lighting are controlled. Grown on straw beds, they are harvested, graded and packed by hand.

Prince de Bretagne's shii-take are **available throughout the year, in wood, cardboard and plastic packaging, and are offered in two sizes** (3/6cm and 6/9cm).

Info for PROFESSIONALS

Conservation

Cool between 2°C and 4°C. In these conditions, Shiitake mushrooms can be conserved for up to 14 days.

On shelf

Sensitive to handling. Avoid overlong exposure to heat to reduce drying out.

Info for CONSUMERS

How to make the right choice?

The tops of Shiitake mushrooms are usually of several shades of brown.

Conservation

In a paper bag in the fridge.

Cooking

Stands up well to cooking. Perfect for Asian dishes.

A mushroom requiring thorough cooking before consumption.

Nutrition

Energy 28 kcal per 100g, they are a source of potassium and fibre.

EARLY POTATOES

Early potatoes are an iconic and historical crop in Brittany's vegetable production areas. Prince de Bretagne's Early potato season is divided into two parts.

- Primaline, potatoes harvested by hand and sold from February.
- Primabreizh, available from late May and harvested mechanically, washed and packed

Production calendar	J	F	M	A	M	J	J	A	S	O	N	D	Volume in tons
PRIMALINE													1 500
PRIMABREIZH													12 000

Prince de Bretagne is a partner in the "Primeur de France" campaign, the logo of which guarantees.

PRIMALINE

Primalines are harvested by hand. Available from February, they are produced under cover until early May and then in open fields until the end of the season. To ensure good quality and a consistent product throughout the season, Primalines "open fields" are showered with peat.

PRIMABREIZH

Primabreizh represents the bulk of Prince de Bretagne's Early potato volumes. Harvested mechanically, they are available from May when their maturity allows. They are washed and offered in different packaging formats and sizes.

1 kg Primabreizh freshness sachet:

- improves conservation and limits greening
- ideal for 3-4 people
- purchasing frequency

Freshly harvested: harvested by hand or machine, loose or packaged, Prince de Bretagne's Early potatoes are sold immediately after harvest.

Info for PROFESSIONALS

Conservation

Keep cool and away from light. Treat Early potatoes as a fresh vegetable.

On shelf

Limit exposure to light. Offer with seasonal vegetables, doubling-up on your potato range with a pre-packed offer. Regularly remove green or damaged tubers to ensure an attractive display. Highlight the concept of fresh to drive your sales.

Info for CONSUMERS

Conservation

Several days in the fridge.

Preparation

No peeling before cooking is required.

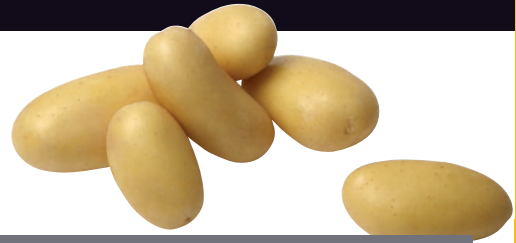

Cooking

Sauté, steam or microwave, as a side dish or in salads.

Nutrition

Early potatoes are a source of vitamins C and B6 and contain only 77kcal/100g. They are light and tender as their sugars have not yet been transformed into starch.

PRINCE de BRETAGNE PRODUCT+

More than 40 years of expertise in an oceanic climate guaranteeing fruit quality and conservation, to offer:

- Volumes of essential lines
- A large and innovative range of more than 30 varieties.

Located between the Brest peninsula, Saint Pol de Léon and Paimpol, Prince de Bretagne's producers have been developing from the early 1980s, greenhouse cultivation (glass greenhouses, plastic greenhouses and tunnels).

Prince de Bretagne is France's largest tomato producer (by volume and a **specialists in vine tomatoes**).

Committed and demanding, producers have adopted a quality-environment programme, combining consumer safety and respect for the environment:

- Agri-Confiance and GlobalGAP certified producers, IFS certification of a grading and packing station.
- Varieties are carefully bred with the help of a network of experimental stations, a group of specialised technicians who ensure the optimisation of **growing practices, product specifications** which are among the most demanding on the market and **sensory tasting panels**.
- Prince de Bretagne's producers are fully committed to producing tomatoes using techniques which are ever-more healthier and sustainable, in particular through the use of beneficial insects to naturally protect and pollinate their plants.

NEW LABEL

SANS Pesticide
Saveur UNIQUE

• **Major support from producers :**
2/3 of vine tomato producers

• **100% Nature & Saveurs (Nature & Taste) Specifications** the + most demanding in the market and the + reassuring for your customers

• **A full range is available,** including leading lines and produce for range diversification (see the following pages).

A COMMITMENT ON PRACTICES

- Prince de Bretagne's producers use only biocontrol products on their tomato crops labelled 100% Nature & Saveurs, **no chemical pesticides are used**.
- 100% of Prince de Bretagne's producers use beneficial insects to naturally protect and pollinate their tomato plants.

A COMMITMENT ON RESULTS

- **Zero residues of quantifiable synthetic molecules**, beyond the limit of quantification of 0.01mg/kg.
- Screening by two nationally known independent laboratories for more than **240 active ingredients**, both synthetic and natural, including environmental contaminants such as chlorates.

RESPECT FOR THESE COMMITMENTS

- It is obligatory for each producer to respect these specifications **throughout the season**.
- It's a commitment which will be verified from 2018 by an independent **certification body**.

UNIQUE FLAVOUR

- Varieties are bred according to their **taste potential**.
- Tomatoes are **harvested when perfectly ripe**, with a reduced delay between harvesting and shipping.

NOIRE D'ANTAN

A sweet and fragrant variety with fine skin and flesh. For maximum taste it should be eaten when the colour is 'turning', with the collar green.

Pack • 3,5 kg

Punnet • 500 g

PINEAPPLE D'ANTAN

Surprising tomato with yellow flamed flesh reminiscent of pineapples. Fondant and tasty.

Pack • 3,5 kg

Punnet • 500 g

GREEN D'ANTAN

Fondant, emerald green flesh. Sweet yet spicy taste. Does not turn red, should be eaten before the fruit softens. Yellow edges indicate that the fruit is ripe.

Pack • 3,5 kg

Punnet • 450 g

MARMANDE D'ANTAN

Traditionally grown in open fields and gardens in south-west France and Sicily. Ribbed variety, fleshy and juicy. Lightly acid, but sweet and fragrant.

Pack • 3,5 kg

Punnet • 500 g

SAN MARZANO

Originated in Italy. Fondant with a sweet taste and little acid. Ideal for sauces or in sandwiches because of its low juice content and its very fleshy texture.

Pack • 4 kg

San Marzano single layer tray • 7 kg

PINK TOMATO

Traditionally eaten in Japan and Asia. Pink, full flesh and juicy. Sweet, fondant with a fragrant aroma.

Pack • 3,5 kg

Punnet • 450 g

CORNUE

Its pointed shape is a reminder that tomatoes are in the same family as peppers. Full and firm flesh with few pits and little juice. Fragrant and sweet with no acidity.

Pack • 3,5 kg

TÉTON DE VÉNUS

Pronounced red colour and an original and evocative pointed shape. Appreciated for their dense flesh (full fruit), juicy and excellent pronounced tomato flavour. They are equally notable for their keeping qualities and relatively homogeneous medium size.

Pack • 3,5 kg

BLACK CŒUR D'ANTAN

Pointed and heart-shaped, this tomato is appreciated for its meaty character (packed with flesh and no juice) and its sweet, fragrant flavour.

Pack • 3,5 kg

Cœur de pigeon

Intense red elongated cherry tomato, sweet and less acid than red cherries.

Red cherry

Round, juicy, for snacking.

Tasty red cherry

Harvested with the stalk attached, this variety is the sweetest and tastiest in the range.

Yellow cherry

Intense straw-yellow, sweeter. Very tasty.

Orange Cœur de pigeon

Elongated cherry, mild and sweet, quite fleshy.

Black cherry

Chocolate-coloured tomato, lightly striped, juicy, crunchy, sweet and acid.

VEGETABLES FOR GRILLING

PRODUCTION CALENDAR

J F M A M J J A S O N D

VEGETABLES FOR GRILLING

Practical

Thanks to Prince de Bretagne's Vegetables for Grilling tray, offering a new possibility for pepper and tomato consumption: hot, straight from the barbecue!

It's very much a solution product, easy to use and with everything in place for cooking, including a recipe on the back of the pack! The tray can be used directly on the barbecue grill, on the griddle or in the oven.

Rinse the vegetables, season with olive oil and get cooking!

Tasty

Fresh and top-tasting Cocktail tomatoes and peppers which can accompany all dishes.

A practical and tasty concept:

A mixture of vegetables in a tray which can be placed directly on the barbecue!

Multi-use

Barbecue cancelled? Or you want a good home-cooked dish?

Rinse and slice the Cocktail tomatoes and mini-peppers, mix two eggs and 200ml of crème fraîche and cook together in the tray for 20 minutes at 200°C (400°F) for a rapid home-made vegetable flan!

Optimised and quality packaging

Available in packs of six and 12 Aluminium tray, cardboard sleeve and plastic cover to be recycled

Packaging	Box weight	Box size [cm]	No. boxes/pallet		EAN 13

MY TOMATO BASKET

A selection of tomatoes ideal for a family meal in a free basket which the consumer can keep and refill over the course of the season.

A 1.5kg selection of tasty tomatoes:

- Tasty vine tomatoes for salads
- Traditional and coloured tomatoes for carpaccios or multi-coloured presentations
- A selection of coloured cherry tomatoes for snacking or aperitif nibbles

A basket to remind consumers that tomatoes are a fruit and should not be stored in the refrigerator as the cold changes their taste and flavours. Rather, they should be kept in a basket in the open air, ideally between 12°C and 14°C.

Fresh tastes best

FENNEL

Fennel, with its distinctive aniseed taste, has its origins in the Mediterranean region and is available in the Prince de Bretagne range between July and November. It is harvested and packed by hand directly on the farm, and offered in four sizes.

Production calendar	J	F	M	A	M	J	J	A	S	O	N	D	Volume in tons
FENNEL													400

Info for PROFESSIONALS

Conservation

Fennel is a living product and should be handled carefully. Keep in cool conditions, between 6 and 8 degrees C.

On shelf

Do not display it on-shelf for more than three days. Put back into coldstore and lightly dampen at the end of every day.

Info for CONSUMERS

Making the right choice

Fennel should be a good white colour with a rounded bulb and the stem should not be yellowy or woody. Bright green stems are a guarantee the produce is fresh.

Cooking

Fennel is good as an aperitif as well as a starter, side dish or even dessert.

Nutrition

Fennel is a source of folic acid (vitamin B9) and potassium, and low in calories.

Conservation

Store in the vegetable drawer of the refrigerator.

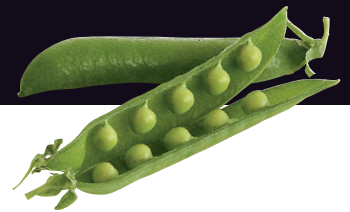

Product	Size	Box size (cm)	Box weight	No. of boxes per pallet (max)		
				80x120	100x120

COURGETTE

Fresh tastes best

Prince de Bretagne courgettes are grown under cover from June to July and in open fields from July to the beginning of November. Precise sizing (14-17 and 17-21cm) is offered for range segmentation and an offer better adapted to demand. Each courgette is cut by hand and boxed directly in the field by the producer.

JACK BE LITTLE													300 kg
PATIDOU													1
WHITE AND YELLOW PATISSON													1

Prince de Bretagne also produces a range of squash, including Potimarron, Musquée de Provence and Spaghetti squash.

A long period of availability, especially for the potimarron.

POTIMARRON

The undisputed leader of the range. Its pear shape, orange-coloured flesh and taste have earned it the alternative name of chestnut squash.

BUTTERNUT

Try its smooth texture. Also known by the name Doubeurre, its flesh means it can be cooked like a potato.

PATIDOU

The orange flesh of this squash offers a sweet, hazelnut taste. Its shape and size make it ideal for stuffing or for presenting soups!

SPAGHETTI

When cooked, its flesh forms long strings just like spaghetti! Perfectly matched with any pasta sauce.

JACK BE LITTLE

A mini-pumpkin with the taste qualities of Potimarron. Offers thick orange-yellow flesh with a chestnut flavour

WHITE AND YELLOW PATISSON (PATTY PAN)

A flying saucer for the plate! Offers an original flattened and circular shape, with perfumed flesh carrying a note of artichoke.

MUSQUÉE DE PROVENCE

Savoury or sweet, as a starter or a pudding. A good-looking ribbed squash with a sweet and musky flavour. Its flesh is tender and juicy.

ROUGE VIF D'ETAMPES

The Halloween squash! This pumpkin variety has a flattened shape, with a beautiful orange-red colour and offers tender flesh.

KABOCHA

A dark green squash with pale green stripes. Its flesh is very tender.

MINI-VEGETABLES

Harvested by hand, Prince de Bretagne mini-vegetables owe their small size to the very careful selection of varieties, a specialised growing technique (dense planting) and early harvesting, when the vegetables are at their most tender.

Prince de Bretagne has a range of more than 15 mini-vegetables. These vegetables, sold principally in trays, are very popular with consumers planning dinner parties and during festive periods.

All of Prince de Bretagne's organic vegetables are grown and monitored with the greatest respect for organic specifications, and have been for more than 20 years.

Rotations, respect for the seasons, varietal choice and skilled growing practices allow Prince de Bretagne's 50 organic producers to harvest 20,000 tonnes of vegetables a year and to offer you a range of more than 30 different vegetables.
